	Name	CAS Number EINECS Number %							
		Image: Constraint of the second sec							
		ardous or Reportable Ingredients							
l	First Aid Measures	Oberly for and remains any context langues, langue distably fluck and							
	Eye Contact	Check for and remove any contact lenses. Immediately flush eye with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if symptoms occur.							
	Skin Contact	In case of contact, immediately flush skin with plenty of water for least 15 minutes while removing contaminated clothing and shoe Wash clothing before reuse. Get medical attention if symptom occur.							
	Inhalation	Move exposed person to fresh air. If not breathing, if breathing irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as collar, tie, belt, or waistband. Get medical attention if symptom occur.							
	Ingestion	Wash out mouth with water. Do not induce vomiting unless directer to do so my medical personnel. Never give anything by mouth to a unconscious person. Get medical attention if symptoms occur.							
	Protection for first-aiders	No action shall be taken involving any personal risk or v suitable training.							
	Note to Physician	No specific treatment. Treat symptomatically. Contact pois treatment specialist immediately if large quantities have be ingested or inhaled.							
5.	Firefighting Measures								
	Suitable Extinguishing Media	Dry Chemical, CO ₂ , Foam. or Water Fog							
	Special Exposure Hazards	Promptly isolate the scene by removing all persons from the vicin of the incident if there is a fire. No action shall be taken involvin any personal risk or without suitable training.							
	Hazardous thermal decomposition products	Burning may produce carbon monoxide, carbon dioxid formaldehyde, as well as small amounts of other toxic fumes.							
		Fire-fighters should wear protective equipment and self-contained

			container Note: Se	Dispose	of via a licensed was for emergency contact	ignated, labeled waste ste disposal contractor. information and section			
7.	Handling and Stor	rade							
	Handling	Eating, d this mate wash ha Remove entering	Put on appropriate personal protection equipment (see section 8). Eating, drinking, and smoking should be prohibited in areas where this material is handled, stored, and processed. Workers should wash hands and face before eating, drinking, and smoking. Remove contaminated clothing and protective equipment before entering eating areas.						
	Storage		Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool, and well ventilated area, away from incompatible materials (see section 10 and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

	Engineering Measures	No specific ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.
	Hygiene Measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking or using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
	F	Personal Protection
	Respiratory	Use properly fitted, air-purifying or air fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
	Hands	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
	Eyes	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposures to liquid splashes, mists, or dusts.
	Skin	Personal protection equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
	Environmental Exposure Controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements or environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
