

# **Material Safety Data Sheet**

### Innovation and Experience at Work

## RheoGel 722A

| 1.                           | Substance, Preparation, and Company Description |   |  |  |
|------------------------------|---|---|--|--|
|                              | Material Uses                                   | Lubricant, Grease, Industrial applications  |  |  |
|                              |   | Engineered Custom Lubricants (ECL)  |  |  |
|                              | Manufacturer                                    | 3851 Exchange Ave.  |  |  |
|                              |   | Aurora, IL 60504  |  |  |
|                              |   | 1-630-449-5000  |  |  |
|                              | Product Code                                    | RheoGel 722A  |  |  |
|                              | Validation Date                                 | January 28, 2015  |  |  |
|                              | In case of emergency contact                    | 1-630-449-5000  |  |  |
| 2.                           | Hazards Identification                          |   |  |  |
|                              | Emergency Overview                              |   |  |  |
|                              | Physical State                                  | Semi-solid, grease  |  |  |
|                              | Color   | Off-white   |  |  |
|                              | Odor  | Odorless  |  |  |
|                              | Hazard Statements                               | NOT EXPECTED TO PRODUCE SIGNIFICANT ADVERSE HEALTH EFFECTS WHEN THE RECOMMENDED INSTRUCTIONS FOR USE ARE FOLLOWED.  |  |  |
|                              | OSHA/HCS Status                                 | While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of the product. |  |  |
|                              | Routes of Entry                                 | Dermal contact. Eye contact. Ingestion  |  |  |
|                              | -   | Potential acute health effects  |  |  |
|                              | Inhalation                                      | No known significant effects or critical hazards.   |  |  |
|                              | Ingestion                                       | No known significant effects or critical hazards.   |  |  |
|                              | Skin  | No known significant effects or critical hazards.   |  |  |
|                              | Eyes  | No known significant effects or critical hazards.   |  |  |
|                              | Po  | otential chronic health effects   |  |  |
|                              | Chronic effects                                 | No known significant effects or critical hazards.   |  |  |
|                              | Carcinogenicity                                 | No known significant effects or critical hazards.   |  |  |
|                              | Mutagenicity                                    | No known significant effects or critical hazards.   |  |  |
|                              | Teratogenicity                                  | No known significant effects or critical hazards.   |  |  |
|                              | Fertility effects                               | No known significant effects or critical hazards.   |  |  |
|                              | Developmental effects                           | No known significant effects or critical hazards.   |  |  |

| 3. | Composition/Component Data                         |   |
|    | Name   | CAS Number EINECS Number %  |
|    |  |   |
|    |  |   |
|    | No Haz   | zardous or Reportable Ingredients   |
| 4. | First Aid Measures                                 |   |
|    | Eye Contact  | Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if symptoms occur.  |
|    | Skin Contact                                       | In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Get medical attention if symptoms occur.  |
|    | Inhalation   | Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt, or waistband. Get medical attention if symptoms occur. |
|    | Ingestion  | Wash out mouth with water. Do not induce vomiting unless directed to do so my medical personnel. Never give anything by mouth to an unconscious person. Get medical attention if symptoms occur.  |
|    | Protection for first-aiders                        | No action shall be taken involving any personal risk or without suitable training.  |
|    | Note to Physician                                  | No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.  |
| 5. | Firefighting Measures                              |   |
| J. | Firefighting Measures Suitable Extinguishing Media | Dry Chemical, CO <sub>2.</sub> Foam. or Water Fog   |
|    | Special Exposure Hazards                           | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
|    | Hazardous thermal decomposition products           | Burning may produce carbon monoxide, carbon dioxide, formaldehyde, as well as small amounts of other toxic fumes.   |
|    | Special protective equipment for firefighters      | Fire-fighters should wear protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |
| 6. | Accidental Release Measures                        |   |

|    | Personal Precautions  |                       | suitable tand unpr  | training. Ev<br>otected pe   | acuate surrounding are<br>rsonnel from entering.<br>erial. Put on appropri                            | ersonal risk or without<br>eas. Keep unnecessary<br>Do not touch or walk<br>ate personal protection                                 |  |
|----|---|-----------------------|---|--|---|---|--|
|    | Environmental Precau  | utions                | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains, and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil, or air).   |  |   |   |  |
|    | Methods for Clean up  |                       | Small spill: Move containers from spill area. Vacuum or swe material and place in a designated, labeled waste cont Dispose of via a licensed waste disposal contractor.  Large spill: Move containers from spill area. Prevent entr sewers, water courses, basements, or confined areas. Vacuu sweep up material and place in a designated, labeled container. Dispose of via a licensed waste disposal contri Note: See section 1 for emergency contact information and set 13 for waste disposal. |  |   |   |  |
| 7. | Handling and Stor   | rage                  |   |  |   |   |  |

|     | Engineering Measures                  | No specific ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.                             |  |
|-----|---------------------------------------|--|--|
|     | Hygiene Measures                      | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking or using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |  |
|     | P                                     | ersonal Protection   |  |
|     | Respiratory                           | Use properly fitted, air-purifying or air fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  |  |
|     | Hands                                 | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.  |  |
|     | Eyes                                  | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposures to liquid splashes, mists, or dusts.   |  |
|     | Skin                                  | Personal protection equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |  |
|     | Environmental Exposure Controls       | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements or environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.   |  |
|     |                                       |  |  |

|--|--|---|--|
|  | Aquatic Ecotoxicity  | There is no data available on the preparation itself  |  |
| Persistence/Degradability  This product has not been tested for biodegradation. No biodegradable. This product is not expected to bioaccuthrough food chains in the environment. |  |   |  |
|  |  |   |  |
| 13.  | Disposal Considerations  |   |  |
|  | Waste Disposal   | The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions, and any by-products should at all times comply with the requirement of environmental protection and waste disposal legislation and any regional or local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and it's container must be disposed of in a safe way. Empty containers or liners may contain some product residues. Avoid dispersal of spilled material and run-off and contact with soil, waterways, drains, and sewers. |  |
|  |  | ce with applicable regional, national, and local laws and regulations   |  |
|  | Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE LIMITS AND PERSONAL PROTECTIVE EQUIPMENT for additional handling information and protection of employees. |   |  |
