		Over-exposure signs/symptoms				

	Interest of	No an artificial at a			
	Inhalation	No specific data			
	Ingestion	No specific data			
	Skin	No specific data			
	Eyes	No specific data			
	Medical conditions aggravated by over- exposure	None known			
3.	Composition/Component Data				
	Name	CAS Number EINECS Number %			
	No Haz	zardous or Reportable Ingredients			
4.	First Aid Measures				
	Eye Contact	Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if symptoms occur.			
	Skin Contact	In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Get medical attention if symptoms occur.			
	Inhalation	Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt, or waistband. Get medical attention if symptoms occur.			
	Ingestion	Wash out mouth with water. Do not induce vomiting unless directed to do so my medical personnel. Never give anything by mouth to an unconscious person. Get medical attention if symptoms occur.			
	Protection for first-aiders	No action shall be taken involving any personal risk or without suitable training.			
	Note to Physician	No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.			
5.	Firefighting Measures				
<b>J.</b>	Firefighting Measures Suitable Extinguishing Media  Dry Chemical, CO <sub>2.</sub> Foam. or Water Fog				
	Special Exposure Hazards	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.			
	Hazardous thermal decomposition products	Burning may produce carbon monoxide, carbon dioxide, formaldehyde, as well as small amounts of other toxic fumes.			
	Special protective equipment for firefighters	Fire-fighters should wear protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.			
6.	Accidental Release Measures				

	Personal Precautions		suitable tand unprotection through	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protection equipment (see Section 8).				
	Environmental Precau	utions	Avoid dispersal of spilled material and runoff and contact with waterways, drains, and sewers. Inform the relevant authorities product has caused environmental pollution (sewers, water soil, or air).					
Small spill: Move containers from spill are material and place in a designated, la Dispose of via a licensed waste disposal containers from spill. Move containers from spill sewers, water courses, basements, or consider up sewers, water courses, basements, or consider. Dispose of via a licensed was Note: See section 1 for emergency contact 13 for waste disposal.					abeled waste container. ontractor. area. Prevent entry into nfined areas. Vacuum or signated, labeled waste aste disposal contractor.			
7.	Handling and Stor	rage						
,,	Handling	gu	Eating, dithis mate wash ha Remove entering e	rinking, and erial is hand ands and contaminate eating areas	I smoking should be prodled, stored, and prod face before eating, ded clothing and prote s.	ripment (see section 8). rohibited in areas where essed. Workers should drinking, and smoking. ctive equipment before		
	Storage		Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool, and well ventilated area, away from incompatible materials (see section 10 and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.					
8.	Evnosure Limits a	and Personal Prote	octive Far	uinment

			upational E					
		Ingredient			Exposure Limits			
	Recommended Monito	oring Procedures	If this product contains ingredients with exposure limits, personal, workplace, atmosphere, or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment.					

	Engineering Measures	No specific ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.
	Hygiene Measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking or using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
	P	ersonal Protection
	Respiratory	Use properly fitted, air-purifying or air fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
	Hands	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
	Eyes	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposures to liquid splashes, mists, or dusts.
	Skin	Personal protection equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
	Environmental Exposure Controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements or environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
9.	Physical and Chemical Properties	
	Physical State	Semi-solid, grease

Persistence/Degradability  This product has not been tested for biodegradation. No biodegradable. This product is not expected to bioacthrough food chains in the environment.					
13.	Disposal Considerations				
	Waste Disposal	The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions, and any by-products should at all times comply with the requirement of environmental protection and waste disposal legislation and any regional or local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and it's container must be disposed of in a safe way. Empty containers or liners may contain some product residues. Avoid dispersal of spilled material and run-off and contact with soil, waterways, drains, and sewers.			
		ce with applicable regional, national, and local laws and regulations			
	Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE LIMITS AND PERSONAL PROTECTIVE EQUIPMENT for additional handling information and protection of employees.
