

# **Material Safety Data Sheet**

### Innovation and Experience at Work

## ViscoTech R406

1.	Substance, Preparation, and Company Description		
	Material Uses	Lubricant, Grease, Industrial applications	
		Engineered Custom Lubricants (ECL)	
	Manufacturer	3851 Exchange Ave.	
	Wallulacturel	Aurora, IL 60504	
		630-449-5000	
	Product Code	ViscoTech R406	
	Validation Date	February 3, 2015	
	In case of emergency contact	1-630-449-5000	
	11		
2.	Hazards Identification		
		Emergency Overview	
	Physical State	Semi-solid, grease	
	Color	Tan	
	Odor	Mild petroleum odor	
	Hazard Statements	NOT EXPECTED TO PRODUCE SIGNIFICANT ADVERSE HEALTH EFFECTS WHEN THE RECOMMENDED INSTRUCTIONS FOR USE ARE FOLLOWED.	
	OSHA/HCS Status	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of the product.	
	Routes of Entry	Dermal contact. Eye contact. Ingestion	
		ntial acute health effects	
	Inhalation	No known significant effects or critical hazards.	
	Ingestion	No known significant effects or critical hazards.	
	Skin	No known significant effects or critical hazards.	
	Eyes	No known significant effects or critical hazards.	
	Poten	tial chronic health effects	
	Chronic effects	No known significant effects or critical hazards.	
	Carcinogenicity	No known significant effects or critical hazards.	
	Mutagenicity	No known significant effects or critical hazards.	
	Teratogenicity	No known significant effects or critical hazards.	
	Fertility effects	No known significant effects or critical hazards.	
	Developmental effects	No known significant effects or critical hazards.	
	Over-e	exposure signs/symptoms	
	Inhalation	No specific data	
	Ingestion	No specific data	
	Skin	No specific data	

	Eyes	No	specific data				
	Medical conditions aggravated by over-	_	ne known				
	exposure	140	IIC KIIOWII				
	- CAPOCATO

Use properly fitted, air-purifying or air fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known of anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  Chemical-resistant, impervious gloves complying with an approved. Safety eyewear complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.  Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary.  Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposures to liquid splashes, mists, or dusts.  Fersonal protection equipment for the body should be selected as a should be approved by a specialist before handling this product.  Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, furne scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.  9. Physical and Chemical Properties  Physical State Flash Point Not Available Raba Point Not Available N		Hygiene Measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking or using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.		
Respiratory  an approved standard if a risk assessment indicates this is in ecessary. Respirator selection must be based on known o anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  Chemical-resistant, impervious gioves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.  Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoic exposures to liquid splashes, mists, or dusts.  Personal protection equipment for the body should be selected based on the task being performed and the risks involved an should be approved by as pecialist before handling this product.  Ensistions from ventilation or work process equipment should be checked to ensure they comply with the requirements or environmental protection legislation. In some cases, furne scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.  9. 13.	Disposal Considerations					
	Waste Disposal	The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product residues should be disposed of via the foul sewer but processed in a suital effluent treatment plant. Dispose of surplus and non-recyclal products via a licensed waste disposal contractor. Disposal of the product, solutions, and any by-products should at all times come with the requirement of environmental protection and waste disposal legislation and any regional or local authority requirement. Waste packaging should be recycled. Incineration or landfill should be considered when recycling is not feasible. This material a it's container must be disposed of in a safe way. Empty contained or liners may contain some product residues. Avoid dispersal spilled material and run-off and contact with soil, waterways, drain and sewers.				
	Disposal should be in accordance with	d be in accordance with applicable regional, national, and local laws and regulations				
	Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE LIMITS AND PERSONAL
