Final Transition to New ERP System: Shipping Will Resume on April 4

Aurora, IL. March 24, 2016. On Monday, April 4, Engineered Custom Lubricants will complete the transition to J.D. Edwards (JDE) enterprise resource planning (ERP) software. To complete this transition, we must suspend shipping product during the week of March 28.

The new ERP software will provide ECL with a single global platform to; connect all global customer data, seamlessly manage lubricant product formulations for global manufacturing excellence, and provide better transparency to management data that will allow ECL to continually drive continuous improvement in meeting our customer's expectations. Slight changes may be experienced in the appearance of our documentation that you will receive (Pack list, BOL, invoices, etc.).

If you have any questions or concerns, please speak with your ECL sales or customer service representative.
