New Part Numbers Issued for All ECL Products

Aurora, IL. April 7, 2016. On April 4, Engineered Custom Lubricants completed the transition to J.D. Edwards (JDE) enterprise resource planning (ERP) software, which required a change in part numbers to conform to the JDE format. To assist customers in the conversion to new ECL part numbers, a complete list of old and new part numbers can be found on [ECL's website](#). Product names, descriptions, and technical specifications remain the same.

Customer orders using old part numbers will still be processed throughout 2016 to give customers time to transition to ordering with the new part numbers.

If you have any questions or concerns, please contact your ECL sales representative or Natalie McClearn, ECL's customer service manager, at 630-449-5000, Ext. 7446.
